

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A method for printer processing comprising the steps of:
receiving a print designation to print a document that comprises a set of canvases;
constructing a canvas order from the set of canvases;
getting graphics data in the canvas order; and
sending the graphics data in canvas order for printer processing.

2. (Currently Amended) The method as defined in claim 1, further comprising
~~the a~~ step of getting content formats in which the entire set of canvases are available; and
selecting a desired format; and
wherein the getting graphics data step comprises getting graphic data in the selected
format.
A 1

3. (Original) The method as defined in claim 1, wherein the constructing a
canvas order step comprises determining a print specification.

4. (Original) The method as defined in claim 3, wherein the print
specification is one of duplex or booklet.

5. (Original) The method as defined in claim 1, further comprising the step
of printing the processed graphics data.

6. (Original) A system for printing comprising:
a first component for receiving a print designation to print a document that comprises
a set of canvases;
a second component for constructing a canvas order from the set of canvases;
a third component for getting graphics data in the canvas order; and
a fourth component for processing the graphics data in canvas order for printing.

7. (Original) The system as defined in claim 6, further comprising a component for getting content formats in which the entire set of canvases are available; and selecting a desired format; and wherein the third component for getting graphics data gets graphic data in the selected format.

8. (Currently Amended) The system as defined in claim 6, wherein the second component for constructing the canvas order determines a print specification.

9 (Original) The system as defined in claim 6, wherein the first component for receiving a print designation is web content operating within a web browser and provided by a web server.

10. (Original) The system as defined in claim 9, wherein the web content includes the second and third components.

11. (Original) The system as defined in claim 9, wherein the web service comprises the second and third components.

12. (Currently Amended) The system as defined in claim 7 9, wherein the web server comprises the fourth component.

13. (Original) A program product for printer processing comprising computer readable code for causing a system to perform the following method steps of: receiving a print designation to print a document that comprises a set of canvases; constructing a canvas order from the set of canvases; getting graphics data in the canvas order; and sending the graphics data in canvas order for printer processing.
